

**FALL EDUCATION OFFER:** Buy ten or more 8GB Education Smartpen Bundles\* and receive 1 pack of the new Livescribe Sound Stickers per smartpen - a \$24.95 value per smartpen!

**ABOUT LIVESCRIBE SOUND STICKERS:** Livescribe Sound Stickers allow you to audio enable any instructional material for in-class or take-home purposes. Some examples of how sound stickers can be used:

- *Audio-enhanced Flash Cards:* A Sound Sticker is used to give the audio clue for the vocabulary word and also to read the definition to the student. The index card set can be placed on an O-ring and the student can use it as a center activity along with the smartpen or it can be a take-home activity.
- *Augmentative and Alternative Communication (AAC) Device:* Caregivers/therapists can easily audio-enable AAC sheets using Sound Stickers.
- *Second Language Learning:* Sound Stickers with second language recordings of words could be placed on objects in the home and classroom. Students/children can view the object, recall and speak its name in the target language, and then tap on it for confirmation (correct word and pronunciation).
